Motion sickness warning: this game is very nauseating. It has a 'cage' option that helps but for some reason it doesn't turn off or fade when you stop moving so it's quite unplayable because you can't appreciate the aesthetics and that's basically the entire game. It also has an option to constrict your view when you move but it doesn't kick in until you get up to speed and the nausea from that will add up over time, and it has no options to choose how intense the level of occlusion is.

The game is bad, too. It's way too easy to fall down slim cracks in the floor and extremely unforgiving when you try to grab a ledge to save yourself when you fall. It's painfully awkward.

Also the environment is very lackluster and the scenario is dull. I don't feel any need to explore or save this world.

There's pretty much nothing else to the game than that. Real disappointment.. Now polan can into space, and be best friend with Rosja.. I have had constant problems from day one with this game. Every time I come to what I think is supposed to be a save game screen the game crashes, forcing me to quit the game and restart. I checked with Asypr support some time ago and they didn't help and closed the ticket without solving the problem. This game so far was a BIG waste of money.. The game runs well but I have the difficulty on "insane" and am still quite easily beating the computer. This is not me bragging, I'm not actually playing that well. It would be good if the computer engine could be worked on so that the most difficult setting is actually difficult.

Cheers,

-Ziggy. Bees\_1 and put it behind you, that is the reason you bought this game.. Bad. Not even interesting let alone fun. You just sit there and the bullets almost never get as far down the screen as your ship. I died because I got bored. I was glad when I died and it was over.. I am really conflicted about this game. It's simultaneously compelling and truly awful, and what really hurts is that perhaps the worst element of the game is the writing, something I value more than any other element in an RPG. It's a French game, so it's possible there was a problem in translation, but that can't possibly account for the cringe-worthy style.

That being said, the art is interesting, the music is great (mostly, there's some lyrics in the end of Ep. 0 that were awful, but the rest is all instrumental), the story is keeping me playing (despite the details being driven by horrible writing), and the concept is great. I'm not usually drawn in by something as abstract as the "concept" of a game, but how the personal nature of the conflict is woven into the stats/skills progression is actually genuinely enjoyable. "Levelling up" is infused with meaning that other games don't have.

This game is not for everyone, but I will buy the remaining episodes.. Do not play it unless you get paid for it.. Blockwick 2 has a lot to offer. There are quite a few puzzles, and as you get further and further in, they get harder and harder. Plus, each level has challenges: find the pearl (easy) and illumination (hard), which will keep you scratching your head as you try to solve each one. At this time, I've not completed every puzzle, though I'm close, and I've already spent 20+ hours in the game!

---

If you like puzzles, for the price you pay, this is a great deal!

---

10/10 Nep is delish.. Not the best story and rather short, although there are options and multiple ending. The art is also rather meh, but not the worst.

I'll say its 5/10 playable but nothing special. Really high quality!. This is the second half of Umineko. It's just about as good as the question arcs, if you ask me.. Nice little relaxing puzzle game, perfect when you want to take a breath and calm yourself after all that shooting or just hard day :)

You can finish it under 2h without breaking a sweat :). This is probably one of the slowest Nancy Drew games, but don't give up on it. All Nancy narratives are worth at least one try. I especially loved the wolf in the story:) You'll fall in love with the atmosphere, too.. Cute and spooky as hell. nice price for a great game seriously

you build a base and explore for unlock new recipes weapons and skills like a good rpg, the people say the gameplay of the fights aren't so great but for me its really good

100 % recommended. It's pretty fun. Can get hard once you're at level 40+, but savepoints every 25 levels make it approachable. For four dollars, you can't go wrong. Only issues I've got is a sticky ctrl button, which doesn't allow me to use the beam. This happens every now and again and is remedied by pressing the other ctrl button. The other issue is that I can't find a proper way to quit the game. Alt-Tab > close works though.. F . U . C . K . Epic store :D
